Work experience

Fullstack Software Engineer, McModels 🏢   Dec 2024 - Present (1y 2m)

FREELANCE | Create Without Limits. Build Beyond Boundaries.
Marketplace · Gaming

`PHP` `TypeScript` `Vue.js` `Laravel` `ClickUp` `Git`

- Supported the successful launch of rebranding campaigns
- Innovated new features for vendors and customers
- Implemented a fingerprinting and placeholder system to improve piracy detection

Head of Technology, AnimeLeague 🏢   Nov 2024 - Present (1y 3m)

FREELANCE
Events

`PHP` `React` `React Native` `Next.js` `Laravel` `Git`

- Managed and maintained company infrastructure autonomously
- Sole responsibility for all company code ownership
- Created a new mobile app for customers to access event and ticket information

Software Engineer, Mrs Wordsmith 🏢   Apr 2024 - Present (1y 10m)

Education

`React` `TypeScript` `Next.js` `ClickUp` `Git`

- Maintained critical components of internal company interfaces
- Led the upgrade of multiple packages across a suite of services
- Utilized test-driven development methodology to ensure high-quality code

Project Lead, Wynntils 🏢   Jun 2017 - Present (8y 8m)

FREELANCE
Gaming

`PHP` `MongoDB` `AWS` `Docker` `TypeScript` `Linux` `Laravel` `Git`

- Led service delivery for 40,000 monthly users during a six-year freelance tenure at Wynntils.

- Managed development and administration teams, acted as lead back-end developer, and held roles as Lead SysAdmin and DevOps engineer.
- Gained hands-on experience in AWS Lambda, AWS, MongoDB, SASS, PHP, Git, technical support, REST API, Plesk, TypeScript, GitHub, Linux, web hosting, DNS management, Docker, Laravel, and React.js.

Lead System Administrator, AnimeLeague ⊞
Mar 2024 - Nov 2024 (8m)

FREELANCE
Events

`PHP` `CSS` `HTML` `Laravel` `Git`

- Managed infrastructure for multiple location-based event websites independently
- Developed a custom event management panel with content management system (CMS) for multiple location-based event websites
- Created all new frontend websites for the brand with integrated ticket purchasing

Software Engineer II, Suits Me ⊞
Mar 2022 - Mar 2024 (2y)

Suits Me Card is a fee-paying eMoney account
Fintech · Banking

`PHP` `React` `AWS` `TypeScript` `Node.js` `Jest` `Next.js` `Git`

- Specialize in TypeScript development, enforcing coding standards and best practices to enhance project robustness.
- Drive efficiency by crafting serverless solutions and Lambda functions within AWS, ensuring alignment with industry demands.
- Lead the adoption of TypeScript across projects, promoting maintainability through strong typing.
- Develop innovative projects written in Typescript, contributing to company growth and success.

Software Programmer, Mobalytics ⊞
Apr 2021 - Oct 2023 (2y 6m)

FREELANCE | The All-in-One Companion for Every Gamer
Gaming

`Docker` `TypeScript` `Git`

- Developed and managed a TypeScript Discord bot for support tickets and moderation.
- Utilized Git and Docker in the dynamic environment at Mobalytics to streamline development processes.
- Thrived in an innovative and technology-driven work environment during a two-year freelance engagement at Mobalytics.

Enterprise PHP Developer, Visualsoft Ltd ⊞
Jan 2021 - Mar 2022 (1y 2m)

eCommerce

`PHP` `JavaScript` `Git`

- Develop and enhance bespoke features for top-tier clients at Visualsoft Ltd.
- Integrate cutting-edge APIs like FittingBox Glasses and John Lewis Edge into the platform with precision.
- Resolve bugs meticulously through our bug tracking system.

- Address diverse client-specific requests, tailoring solutions to their unique needs.
- Expand technical proficiency and deliver client-centric, innovative solutions in a fast-paced environment.

PHP Developer, Entigy Software ▦   Sep 2018 - Jan 2021 (2y 4m)

Fintech · B2B · Accounting

PHP   HTML   JavaScript

- Led multiple projects from conception to successful implementation.
- Developed a bank statement aggregator and reconciliation tool, optimizing financial processes.
- Integrated OpenBanking API into the tool for real-time financial insights.
- Upgraded Purchase Invoice Management System with AI and OCR technologies for intelligent PDF invoice processing.
- Improved PIMS by enabling automated invoice uploads via email.

Education

South Cheshire College   Jan 2016 - Jan 2018 (2y)

Information Technology
